ADAPTABILITY

Various sizes are available to suit the **patient's morphology** and your **clinical needs**.

"Patients presenting to the practice will have differing tolerances to having films or imaging plates placed in their mouths. Strong tongue posturing, gag reflexes, arch shape, adult or child, etc will all mean that one film size will not be adequate to take the different types of intra-oral x-rays required. We have different PSPIX² imaging plate sizes available in all our surgeries, and this is essential."

Dr Bhupinder DAWETT
United Kingdom
Dental Surgeon

Dr Todd SNYDER
United States
Dental Surgeon, DDS

"The PSPIX² has been a welcome addition to my dental practice. It has been an investment that has paid for itself over and over again by increasing workflow and patient education."

"The use of PSPIX² has become vital in my daily practice. The imaging plates size 0 and 1 allow me to get quality X-rays with children, even at a very young age. In fact, unlike a traditional rigid sensor, the imaging plates are flexible and easy to hold in the mouth, providing greater comfort and preventing any stress."

Dr Matthias PISAPIA
France
Dental Surgeon
